## PORTFOLIO

# Federal Bureau of Investigation |

► **PROJECT NAME**  
6th Floor  
2 Center Plaza  
Boston, MA

► **SIZE**  
6,000 square feet

The FBI needed an approximately 6,000-square-foot expansion of their field office in Boston. The job, naturally, carried with it a great many security concerns.

► **CONSTRUCTING A SECURE ENVIRONMENT**

Every Lake employee and subcontractor had to be fingerprinted and background-checked before being allowed to work at the site. And then, the construction itself had unique requirements. The FBI was expanding the size of their building footprint, so Lake had to build a special wall around the outside. The wall had soundproofing requirements, plus structural strengthening—such as the inclusion of heavy gauge, welded wire mesh in the wall—to make it difficult for anyone to compromise the security perimeter.

*SECURITY FIRST |  
Lake provided top-notch construction services that met the FBI's stringent security requirements.*
